

Transform the way
your company delivers
Instructor Led Training

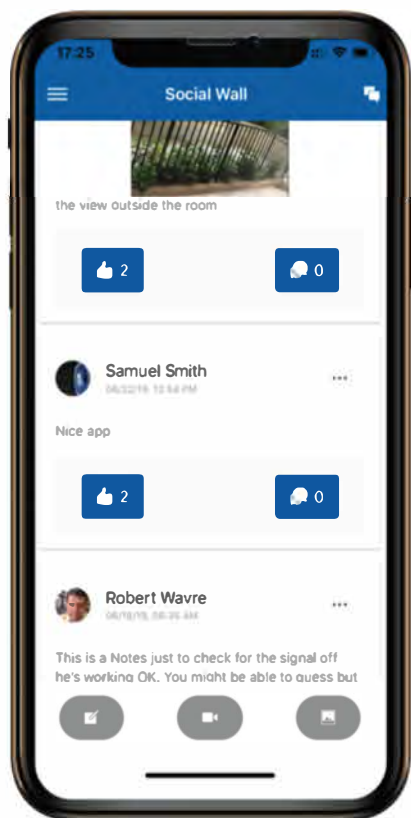

BENEFITS

Digital Materials

ChalkSpeak completely removes the need to print workbooks, cue cards, quiz sheets, and evaluation sheets. Everything can be completed digitally and reported on remotely where relevant. The students have the materials offline on their phone should they need to look up the data at a later date.

Flexibility and Customization

Training documentation is easily controlled and managed. This is very important for any company, which works collaboratively, but also needs to respect intellectual property and security.

Engaging and Multilingual

Keep your audience engaged with quizzes, polls, social feed, and push-notification before, during or after the training, as well as easily translate your training and manage multiple languages together.

No technical skills needed

With workbooks and other online material you already have, YOU can create winning courses. No need for a dedicated team of experts. Comes with apps for web, iOS & Android.

Secure

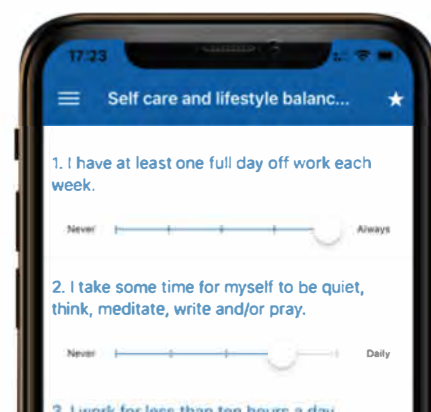

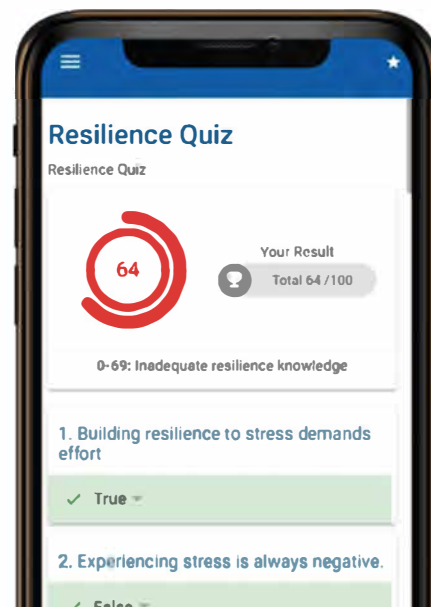

With ChalkSpeak your trainers take control over your data: access management, password protection and management.

Feedback and Reporting

Simple and transparent access to training evaluations and quizzes data.

Higher efficiency and consistency

Give an enhanced experience for both your online and face-to-face Instructor Led Training. Use our tools to send training materials and to keep track of learner interactions. You can control the structure, and visibility, of your training across multiple courses.

OVERVIEW

ChalkSpeak will improve your Instructor Led Training, whilst saving you money, through the use of technology. Whether you use it remotely or face to face we will help you increase interaction, improve reporting, encourage social communication before and after the training, and much more.

There can be significant costs and a bewildering variety of tools for training, so organizations need to find a more efficient way to turn their training into results. ChalkSpeak enriches your Instructor Led Training whether you are just running a small number of courses or need to manage your worldwide, multi-lingual, training strategy with centralized management reporting.

CHALLENGES

Business

- Effectively and quickly onboard and train employees while still measuring success.
- Make sure all employees find the time for learning.
- Build and deliver outstanding training experience for sales, new hires, business departments, etc. through all offices/locations.

Managers

- Remove the cost of printing materials for courses
- Access reports on student achievement and engagement.
- Receive accurate evaluation reports, positive and negative, on the feedback for trainers, training locations, etc.

Trainers

- Minimizing the time spent on preparing content
- Receive, check, and analyze hundreds of answers from all training sessions, and deliver reports before the deadline.
- Effective time and crowd management and high audience engagement.
- Quick learning tools for training.
- Manage multiple trainings around the world from one hub.
- Make sure the most important information is available for students when they need it

FEEDBACK

“ Saving time, honest and active participation from all participants (no one needs to feel shy to give the answer), on the top of it 'paperless'.

“ Easy and fast (user friendly). Less paper. Easy to read and bring everywhere.

“ The live polls! I think they're amazing and make participants participate actively, and harvest real data in real time as well :)

“ It connects all participants n can keep memo, photo n video in it

SOLUTION

- ChalkSpeak has allowed our clients to **remove printed materials**. No stress, no printing, no missing materials. Available on web, iOS, Android.
- Delivering training online and offline (once downloaded) has helped to **save time and costs** on logistics and invest resources in developing a better training experience that brings faster onboarding and higher team success.
- Online and offline training allows employees and customers access up-to-date training from **anywhere any time**.
- All materials and data in one place on your phone, tablet or laptop. **No additional costs** for expensive corporate systems or devices.
- Use **anonymous poll questions** to get honest views from the group on questions. This can help direct discussions to areas that need it most immediately, and means that you hear from everyone – not just the most confident members of the group.
- All quizzes, evaluations and poll question answers can be seen separately by management when they are reviewing and comparing courses that have run in different places, giving one central area for **management analytics**.
- **Push notifications** can be targeted to members of a particular training. This can be helpful for asking everyone to come back from lunch to the room or online collaboration session, or for telling them the workbook has been updated some months after their training.
- **Social wall** makes your audience more engaged and connected.

RESULTS

All the data is based on the feedback received after the World Vision training (using ChalkSpeak) in Burundi, Indonesia, and South Africa in 2019-2020. In the immediate future, they are intending to use Zoom and ChalkSpeak together.

Questions below were Likert style 1-5.

96%

reported workbook was easy to use (where 61.90% said it was VERY EASY)

100%

said the poll questions were useful (where 78.57% said it was VERY USEFUL)

97%

said ChalkSpeak app was overall useful in the training, (where 81 % said it was VERY USEFUL)

Cost saving

the cost of ChalkSpeak is more than covered by the reduction in printing costs for most clients

4.7 of 5

rated at Google Play as of 15th April 2020

“ With the use of ChalkSpeak App, our team has lessen some costs especially that we do not need to print a number of workbooks for the students. Now that the use mobile technology has changed a lot in accessing information and services in one click, ChalkSpeak has driven our team/World Vision to move to this path.

The student engagement during training, ex: interactive polls, seeing poll results.. makes the subject matter more relevant, more interesting and (to some) become an eye opener, not just among the participants but to management as well. The anonymity of responses from the polls has engaged all the participants and not just for a few, a good way of seeing and hearing the 'voices' of all. ”
